

ArtVault

A new art marketplace company called ArtVault has emerged. The company is coming in at full force and is ready to take the art world by storm! As the company mainly has artists and gallery curators as their employees, they know very little about software development and creating sustainable web applications. This is where you and your group come in! Your job is to provide ArtVault a robust web application using state-of-the-art technologies such as Django, Python and Postgres.

Database

All groups must create their own PostgreSQL database within Azure. Information regarding setting up the Azure database can be found on Canvas (both as a video lecture which demonstrates how to create it, along with a guide).

Technical specifications

In this assignment there is a requirement to use the following:

- Git with a remote repository (GitHub / GitLab / etc.)
- PostgreSQL
- Django

Assignment description

In order to complete the assignment the following requirements must be implemented. Note that by finishing all the core requirements listed below, the total grade can only reach a total of 7. In order to gain a perfect score of 10, you will need to add extra requirements to the system.

Extra requirements

Extra requirements are required in order to get a perfect score of 10. These extra requirements cannot come as a placeholder for core requirements and therefore will only be taken into consideration if all core requirements have been implemented. The extra requirements will be graded by the following criteria:

- Complexity - how complex is the implementation of this extra requirement.

- Estimated completion time - what is the estimated completion time needed to fully implement this extra requirement.
- Creativity - is the extra requirement implemented using creative and innovative solutions and overall thinking outside the box.

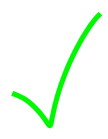

Core requirements

Core requirements are needed to have a functional system. In order to gain a score of 7.0 you will need to implement all the requirements listed below.

- (3%) Layout of the site
 - Navigation bar
 - Footer
- (6%) Profile page - *shows profile information about the logged in user*
 - Display the following fields
 - Name
 - Profile image
 - Ability to edit the fields
 - Name
 - Profile image
 - The profile image should be uploaded from your computer
 - A button to update the profile information
 - If successfully submitted a confirmation should appear to the user
 - If the operation fails the user should see a clear indication that something failed
- (12%) Artwork catalogue - *lists available artworks*
 - Display a list of all available artworks
 - Artwork title
 - Artwork thumbnail
 - Starting bid price
 - Medium (*e.g. oil, watercolour, sculpture, photography*)
 - Dimensions (*width x height in cm*)
 - Information whether it has been sold or not. An artwork which has an accepted bid is considered sold
 - A link to the artwork details page
 - Filters
 - Filter by medium, *e.g. oil, watercolour, sculpture, photography*
 - Filter by price range

- Filter by style, *e.g. abstract, realism, impressionism, modern*
 - Search (*based on case-insensitive artwork title*)
 - Order by price and title
 - All filters should be inclusive
- (6%) Artwork details - *shows detailed information about a specific artwork*
 - Artwork information
 - Title
 - Medium
 - Style
 - Starting bid price
 - Listing date
 - Information whether the artwork has been sold. An artwork which has an accepted bid is considered sold
 - Seller information
 - Name
 - Thumbnail
 - A link to the seller's profile page
 - Images
 - Multiple images of the artwork, *e.g. gallery or slideshow*
 - Additional information
 - Dimensions (*width x height in cm*)
 - Year of creation
 - Edition (*e.g. original, limited edition, open edition*)
 - Provenance (*a brief history of the artwork's ownership*)
 - A button to submit a bid
 - Bids are not available if the artwork has been sold
 - If a bid has already been submitted the button should say "Resubmit a bid" and the current status of the bid should be displayed next to the button
 - If no bid has been submitted the button should say "Submit a bid"
- (6%) Seller profile - *shows detailed information about a seller of an artwork*
 - Name of the seller
 - Type of the seller (*Individual, Gallery*)
 - Address of the seller
 - The address should only be displayed if the seller is of type "Gallery" otherwise it should be hidden
 - Street name
 - City

- Postal code
 - Logo of the seller
 - Cover image of the seller
 - Bio of the seller
 - A list of all artworks listed by that particular seller
 - Each artwork should:
 - Display a thumbnail image
 - Display the artwork's title
 - When clicked on should redirect to the artwork detail page for that particular artwork
- (6%) Submitting a bid
 - A bid can be submitted for each artwork which has not been sold. An artwork which has an accepted bid is considered sold
 - When submitting a bid the following information should be gathered
 - Bid price
 - Expiration date
 - After submitting a bid, a confirmation message should be displayed
- (6%) Bids - *a list of all bids submitted by the logged in user*
 - A list of all bids
 - Each bid should have the following:
 - Title of the artwork
 - A link to the artwork which will lead to the "Artwork details" page
 - Date of bid
 - Expiration date of bid
 - Status of bid (*Pending, Accepted, Rejected and Contingent*)
 - Seller of artwork
 - Bid price
 - A link to finalize the bid if the bid is either accepted or contingent
- (25%) Finalizing a bid - *this happens after the bid has been accepted by the seller*
 - Contact information
 - Address
 - Street name
 - City
 - Postal code
 - Country - *should be displayed as a <select> HTML element and the ability to choose from multiple countries*
 - National id (*isl. kennitala*)

- Payment step
 - Payment options (*Credit card, bank transfer or wire transfer*)
 - If credit card is selected
 - Cardholder name
 - Credit card number
 - Expiry date
 - CVC
 - If bank transfer is selected
 - Bank account (*you are free to use either IBAN, Swift or the Icelandic format*)
 - If wire transfer is selected
 - Name of sending bank
 - Routing number
 - Account number
 - Review step (read-only)
 - Display all information typed in the previous sections without being able to change/edit anything
 - A button to confirm the bid
 - Confirmation step
 - States that the bid was successfully finalized
 - A link to the homepage
 - Easy navigation between steps
 - All information gathered in each step should be available throughout the finalizing phase, meaning that if transitioning between different steps the information should persist between transitions
 - Ability to navigate back and forth between all steps excluding the confirmation step
- 
-
